DETAILED ACTION

1. Claims 1-13 are pending in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by (JP 2000-193804).

JP 2000-193804 discloses a fingerprint easily erasable film comprising one surface of the film is matted, and the matted surface shows a wet tension of 25 mN/m or higher (*English machine translation paragraph [0034]*), a surface roughness of 0.2 to 2.0 μm in terms of ten point mean roughness Rz (*English machine translation paragraph [0030]*) and the whole film has a haze of 1.5 to 35.0% (*English machine translation paragraph [0032]*). The film comprises a substrate and resin layer (*English machine translation paragraph [0035]*), and the resin layer is an ionizing radiation curable resin (*English machine translation paragraph [0039]*). The resin layer contains two kinds of matting agents, e.g. silica particles, with different average particle diameters (*English machine translation paragraph [0040]*).
